We are delighted that the 2015 HIV in the Americas Congress will take place between 16–18 April in Mexico City, Mexico. This meeting promises a scientific programme with regional relevance, via plenary sessions, interactive case study panels, debates, formal and informal discussion. Networking issues for the Region will be a very important part. Faculty will be drawn both from within the region and from international experts. The meeting will be conducted in English and Spanish with simultaneous interpretation between these languages.
